Release Notes 2.2.5
November 14, 2004

The following items have been moved (migrated) to Production for use by Agencies beginning on November 14, 2004.

- An online edit was added to prevent users from entering multiple allotments with the same outing number and account number.

- An online edit was added to prevent the TSP and Leave SCD dates from being greater than the effective date of the action.

- A program was developed to compare tax data between EHRP and Payroll and overlay payroll data with EHRP data. The program will also update the tax letter table so letters can be distributed to affected employees. The OPDIV's will receive copies of the letters that are sent to employees.

- An update was made to the HE_LEAVE process, which automatically increases leave categories for employees based on tenure. The process was updated to select the correct employees. In addition, the process was updated not to select employees in the ES, SL or ST pay plans due to the new regulations that state these employees have eight hours of leave regardless of tenure.

- An online edit was added to enforce TSP Loan Account Numbers to adhere to the following standards:

    o The 9th digit in the account field needs to be moved to the eighth digit. Currently, account codes in EHRP are 1234567-A and they should be 1234567A. This would require removing the dash from the eight digit of the account number.

    o The field should only allow eight characters with the following limitations:
        - First seven characters must be numeric
        - The last character must be E,F,G,H,M,R or X

    o The field cannot contain dashes.

- A program was developed to cleanup invalid TSP Loan Account Numbers. The script will update all TSP Loan account numbers to follow the same standards as the edit.

- The tables with the new FEHB rates, providers and plan changes were updated to reflect the 2005 FEHB plan.

- The maximum rate on the AD, CRS3/02 salary table was increased to $68,000.
